

## Care Instruction

## Instructions

Thank you for choosing SPLOT - we are happy that you share our passion for modern folklore and everlasting design.

Your selected furniture is a handmade product made specially for you. Due to the uniqueness of our constructions, small differences in shape of the objects or shade of wood may occur. Wood is a natural material, its grain structure and color can differ from one piece to another - simply because every single piece is unique and that is exactly what we would love to preserve.

Please, be aware that wooden products react to their surrounding and easily adapt their moisture levels to those around it. When exposed to excessive fluctuations in temperature and humidity, they might start cracking or showing other signs of damage, such as change of shape or lack of balance. For these reasons, please avoid placing your SPLOT item out in the open but also not anywhere around a heater or windows which you keep open during extreme weather conditions. Also, you need to know that wood does not like to be exposed either to sunlight, nor to water for a longer period of time. It should not be in contact with alcohol, cleaning chemistry, heat or other harmful factors. To give your wooden furniture a longer life, keep it also away from sharp or rough objects.

Due to natural properties wooden products can change color over time, but this should not worry you - it is a natural aging process which will only add value to your wooden object.

## Care & Maintenance

There are a few simple rules of everyday usage of your new SPLOT item, which will guarantee it a long-lasting quality.

For care and maintenance of solid wood surfaces, please use only natural detergents and a clean, soft cloth. Do it regularly - handmade wood likes being looked after!

Do not use any harsh cleaning chemistry, such as products containing silicone or abrasives. Please try to avoid rubbing the surface while cleaning, as this will make matte spots on the surface and charge the varnish with static electricity which will collect more dust. Moreover, we do not recommend using furniture polish or wax, as they contain unsuitable solvents and/or color additives which will ruin the natural look of our furniture.

To avoid stains and other damage, wipe away liquids spilled on the surface immediately after they occur. To do it, use only a natural, soft cloth (lightly damp one, if the spilled liquid is sticky).

## **Warranty Conditions**

Our products are covered by a 2 years warranty.

The warranty does not cover damage resulting from natural aging of the product or any other damage caused by improper use or care. For more details please read the Care and Maintenance section.
